

Mr. Hall.

Brook Park. N. Y.

June 23rd 1871

C

Dear friend - Many many thanks
for the Dribble intelligence which
is all that is necessary - Your letter
has given me much to see & see
you really laugh for which we
thank you - as well as for the letter
which says - if I come to Boston
to see the D. I will make ^{my} ~~my~~ ^{my} ~~my~~
known to you & not through
others making a sign.

I heard from a lady whom I
met at the Commencement at

Lucia Colley yesterday (written by
the by the morning Herald reports
me as having shot a bird on Sardinia
specks with Maria Mitchell the
astronomer. got there on to Sardinia
specks, neither of which ^{fact} I saw!
That Mr. Owen had been away from
home returned on Monday &
was quite poorly. from some super-
stition in changing his clothes too early
in the season. so that may account
for his not having answered my
letter about the wind mills - but I
have written again today & asked
for the information. If you had
asked me. I should have pushed

him to get the information for me, when
I was there: Depend upon it when you want
information - simply a woman. Though
I don't believe in humeral woman
Luffrag. I believe in women: 'do you
if you could have seen all the pretty
one I did yesterday - I heard the essays
of the graduates. I assume you it was
rather like going to the foundations
of things & changing them a little.
I want every woman & every man
who earns the money which pays her
or his rent & shows how to read books
& cypher. Every man & woman who
pays taxes - to have a vote - & I would
not give a vote to another soul. Why
can't we have that all arranged after
that fashion?
How delightful to think that we shall

In a baby doulay. & baby grey hounds in
September. I wish it might be true about
our doulay. but I fear - She is all right
has a fancy for going on three legs using
the other to brush the flies off - which
has to be subdued by a "putte reminder".
but she is a good little thing. They
keep her in a nice little house all by
herself & tether her out three hours
every morning to get grass: should they
give her any oats?

No. I don't know any of the Yacht Club
- men that I am aware of. but I may.
Perhaps I may be with you when the race
comes off. would you like it & shall you
be full. you must make no ceremony
with me - I shall hear from you as
soon as I hear from Mr. Gann -
I remain with ever your faithful
son
John Charles Fox Bruce
