

Aug 31. 1865.

Yours & dear mothers note of the 27th - came safe
to hand on the evening of the 28th - Thanks.
Ever, my darling for your dear & loving thoughts
of me - which never fail me. I look always
for my dear daughters notes & letters as true
records of her life & anxious thoughts & desires
for mine. And they are always faithful
& loving. & fall very gratefully upon my
spirit. which is too crowded with care
& anxieties of many kinds to be always
so thoughtful for your happiness as I
might be - unusually happy now, when my
mind was less oppressed than now.
However, you for your dear & loving
certain, that I love you very very dearly.
That I am grateful for all you are to
me - for all the care you try to save me,
for all the comfort you try, in every
way, to be to me. When I feel better &
stronger - all I want to write again. & I shall
be more of a comfort to you. than I can

which I am so good for nothing as I understand.
First foremost, dear to you in Rampard's
address - which is simply N. J. Rainjeard,
Grammont Belgium - he can send the things
to J. Murot to get you. I hope Mrs Dampson
will be careful about your Miss Jarvis lace
she seems in an awful fix about them. Tell
Rampard the things are for Miss Cushman.
She must send or print a long veil as he
can afford for the 7/6 price. Ask him what
is the cheapest thing he has in the shape of
white lace flouncings!
I can write to Mrs Will to Stratat. They
will give you his address at his house 72 F. St. Mon.
I am so worried at hearing that dear baby
has such an influenza a cold upon him - and
certainly hope that by this time, if you did go to
France as you proposed. It has gone way to the
remedies he would have from you. I suppose
he has been covered here in the draft & stable
corn. but wonderful - you have had some high
winds & when that is the case - that which
impalpable dust which flies about in France
so much, which settling upon the mucous

mucous - gives irritation - which causes
that dead feel flow of water from the nose. but
irritating - so you must feed him well!
with you the you father with my dear son
that I have information from Co. Stubbins
that he collected the August dividend on the
Penn Coal & 5 per cent paid in into the hands
of J. O. Stewart. & then advised them to transfer
the 50 shares now in my name ^{into} theirs as
Trustee. thereby avoiding all future difficulties.
They at once "swish" & said they would do so.
I have heard nothing from Mr Macal
Filihin. I have heard nothing from Mr Macal
about the Phil. Del & Del. - has he heard
any thing from the Stewart about it? I wish
to see Macal on the 14th of July about it. I
suppose he must be out of town - I have written
to him again by last week's steamer! I ought
to hear - something from him about the "Spencer
House." & I dare say your father will be hearing
about the 7-30 ^{Del & Del} from Stewart. & get his address
about the Chicago Cent. - State Savings - & pick up
Fair ground Suburban! - will you tell him the
for me. indeed then I need not write a second
letter. Give my best love to him & to your mother
who I hope is better. I am so glad dear little
Stabel is so much improved. She is a dear!

Tell Ned with my best love that I have no
more than a few francs at Mureaux, which
would do him no good - but if he takes the
enclosed note to Richards - they will be
sure to have what he wants - or they will
let him draw a bill on 30 days, on which
the note will answer all the purpose
he will only have to pay interest upon the
money to the Mureaux - until he pays up the
account - & they will give him a check book
which will save his carrying money about
& always be receipts for your bills. for they
cannot be paid without the receipt being
written on the check - especially if written
payable to the name of the person who
you owe. -

I have had "Jesse's" shoes taken off & an
other pair substituted. I have had her hair
cut off  so that she may get a good
to travel  with. & then be clipped when she
gets to home. She is first rate & I will hold
my offer to take it off her hands if she
comes to any distance through being a
Phase. Tell Ned to bring the photos - with
